Subject index*

A

Acetaminophen
Effect of hepatic failure toxins on liver thymidine kinase activity and ornithine decarboxylase activity after massive necrosis with acetaminophen in the rat (Zieve et al), 583

Acetylcholine
Cerebral acetylcholine and energy metabolism changes in acute ammonia intoxication in the lower primate *Tupaia glis* (McCandless et al), 183

Acid
Pharmacokinetic and metabolic interrelationships among branched-chain keto and amino acids in humans (Schauder), 701

Activator
Immunoradiometric assay to measure the binding of a specific inhibitor to tissue-type plasminogen activator (Schleef et al), 408
Urokinase-type plasminogen activator in alveolar macrophages and bronchoalveolar lavage fluid from normal and smoke-exposed hamsters and humans (Bowen et al), 667

Acute phase response
Evidence that production of platelet fibrinogen is synchronous with platelet production in the turpentine-induced acute phase response (Williams et al), 343

Adenine
In vitro detection of endothelial cell damage using 2-deoxy-D-^{3}H-glucose: Comparison with chromium 51, ^{3}H-leucine, ^{3}H-adenine, and lactate dehydrogenase (Andreoli et al), 253

Adenosine
Characteristics of high-affinity and low-affinity adenosine binding sites in human cerebral cortex (John and Fox), 401
Influence of plasma renin content, intrarenal angiotensin II, captopril, and calcium channel blockers on the vasoconstriction and renin release promoted by adenosine in the kidney (Macias-Nuñez et al), 562

Adenosine diphosphate
Ca^{+2} mobilization and fibrinogen binding of platelets refractory to adenosine diphosphate stimulation (Peerschke), 111

Adenosine triphosphatase
Effects of thyroid hormone on Na-K-adenosine triphosphatase activity along the rat nephron (Garg and Tisher), 568
Sodium-potassium-adenosine triphosphatase in nephron segments of spontaneously hypertensive rats (Garg and Narang), 43

Adenosine triphosphate
Adenosine triphosphate degradation in specific disease (Special feature) (Fox), 101

Adherent cell
Suppression of human lymphocyte responses in chronic renal failure mediated by adherent cells: Analysis in serum-free media (Kleiman and Zoschke), 262

α_2-Adrenergic receptor
Increase in human platelet α_2-adrenergic receptor affinity for agonist in unstable angina (Mehta et al), 661

Adriamycin
Adriamycin-induced chronic proteinuria: A structural and functional study (O'Donnell et al), 62

Affinity
Increase in human platelet α_2-adrenergic receptor affinity for agonist in unstable angina (Mehta et al), 661

Aggregation
Aggregation of chymotrypsin-treated thrombasthenic platelets is mediated by fibrinogen binding to glycoproteins IIb and IIIa (Niewiarowski et al), 651
Effect of divalent cations on the interaction of platelets with tumor cells: Aggregation and perfusion studies with two homologous human systems (Bastida et al), 68
Stimulus-specific neutrophil aggregation: Evaluation of possible mechanisms for the stimulus-response apparatus (Ringertz et al), 132

Agonist
Increase in human platelet α_2-adrenergic receptor affinity for agonist in unstable angina (Mehta et al), 661

Airway
Parallel induction of IgE-mediated *Ascaris* antigen airway responses and increased carbachol airway reactivity in rhesus monkeys by infection with *Ascaris suum* (Patterson and Harris), 293

Albumin
Canine antibodies against formaldehyde–dog serum albumin conjugates: Induction, measurement, and specificity (Patterson et al), 93

Alkalosis
Proximal tubule hydrogen ion transport processes in diuretic-induced metabolic alkalosis (Blumenthal et al), 17

Aluminum
Do serum aluminum levels reflect underlying skeletal aluminum accumulation and bone histology before or after chelation by deferoxamine? (Hodsman et al), 674
Low rate of bone formation with or without histologic appearance of osteomalacia in patients with aluminum intoxication (Charhon et al), 123

Alveolus
Urokinase-type plasminogen activator in alveolar macrophages and bronchoalveolar lavage fluid from normal and smoke-exposed hamsters and humans (Bowen et al), 667

*July, pp 1-100; August, pp 101-228; September, pp 229-348; October, pp 349-490; November, pp 491-610; December, pp 611-740.

Amino acid
Pharmacokinetic and metabolic interrelationships among branched-chain keto and amino acids in humans (Schauder), 701
Ammonia
Cerebral acetylcholine and energy metabolism changes in acute ammonia intoxication in the lower primate *Tupaia glis* (McCandless et al), 183
α-Amylase
Alterations in serum pancreatic elastase 1 content in acute and chronic pancreatitis: Comparison with α-amylase activity (Umeki et al), 578
Amyloid P
Radioimmunoassay for urinary amyloid P component (Maury and Teppo), 619
Anemia
Hematopoietic growth factors in human serum. Erythroid burst–promoting activity in normal subjects and in patients with severe aplastic anemia (Yen et al), 384
Angina
Increase in human platelet α_2-adrenergic receptor affinity for agonist in unstable angina (Mehta et al), 661
Angiotensin II
Influence of plasma renin content, intrarenal angiotensin II, captopril, and calcium channel blockers on the vasoconstriction and renin release promoted by adenosine in the kidney (Macias-Nuñez et al), 562
Anion
Effect of alterations in glomerular charge on deposition of cationic and anionic antibodies to fixed glomerular antigens in the rat (Adler et al), 1
Antibody
Canine antibodies against formaldehyde–dog serum albumin conjugates: Induction, measurement, and specificity (Patterson et al), 93
Effect of alterations in glomerular charge on deposition of cationic and anionic antibodies to fixed glomerular antigens in the rat (Adler et al), 1
Enzyme-linked immunosorbent assay for identification and measurement of antibodies to group A streptococcal bacteriophage (Halperin et al), 505
Immunoassay for IgG rheumatoid factor with a murine monoclonal anti-Fd antibody (McDougal et al), 80
Anticoagulant
Plasma concentrations of the natural anticoagulants protein C and protein S in patients with proteinuria (Cosio et al), 218
Antigen
Effect of alterations in glomerular charge on deposition of cationic and anionic antibodies to fixed glomerular antigens in the rat (Adler et al), 1
Effect of insulin treatment in streptozocin-induced diabetic rats on in vitro platelet function and plasma von Willebrand factor activity and factor VIII–related antigen (Winocour et al), 319
Parallel induction of IgE-mediated *Ascaris* antigen airway responses and increased carbachol airway reactivity in rhesus monkeys by infection with *Ascaris suum* (Patterson and Harris), 293
Radioimmunoassay of human platelet thrombospondin: Different patterns of thrombospondin and β-thromboglobulin antigen secretion and clearance from the circulation (Switalska et al), 690
Aorta
Marfan's syndrome: Structural, biochemical, and mechanical studies of the aortic media (Perejda et al), 376
Proliferation of smooth muscle cells in the thoracic aorta after injury to the abdominal aorta: Evidence for a humoral mediator in experimental arteriosclerosis (Stemerman et al), 369
Aplastic anemia
Hematopoietic growth factors in human serum. Erythroid burst–promoting activity in normal subjects and in patients with severe aplastic anemia (Yen et al), 384
Arteriosclerosis
Proliferation of smooth muscle cells in the thoracic aorta after injury to the abdominal aorta: Evidence for a humoral mediator in experimental arteriosclerosis (Stemerman et al), 369
Ascaris suum
Parallel induction of IgE-mediated *Ascaris* antigen airway responses and increased carbachol airway reactivity in rhesus monkeys by infection with *Ascaris suum* (Patterson and Harris), 293
Assay
Development and evaluation of a new kinetic assay for the quantitation of fibronectin gelatin-binding activity (Gelder et al), 416
Enzyme-linked immunosorbent assay for identification and measurement of antibodies to group A streptococcal bacteriophage (Halperin et al), 505
Immunoradiometric assay to measure the binding of a specific inhibitor to tissue-type plasminogen activator (Schleef et al), 408
Radioimmunoassay for urinary amyloid P component (Maury and Teppo), 619
Radioimmunoassay of human platelet thrombospondin: Different patterns of thrombospondin and β-thromboglobulin antigen secretion and clearance from the circulation (Switalska et al), 690
Atmosphere
Effect of atmosphere of incubation on the isolation of group A streptococci from throat cultures (Schwartz et al), 88

B

Bacteriophage
Enzyme-linked immunosorbent assay for identification and measurement of antibodies to group A streptococcal bacteriophage (Halperin et al), 505
Bicarbonate
Effect of acute hypercapnia on renal bicarbonate reabsorption in the dog (Nasca et al), 524

Bile
Pathogenesis of pancreatic and biliary $CaCO_3$ lithiasis: The solubility product (K′sp) of calcite determined with the Ca^{++} electrode (Moore and Vérine), 611
Role of ductular bile water reabsorption in canine bile secretion (Tavoloni), 154
Binding
Aggregation of chymotrypsin-treated thrombasthenic platelets is mediated by fibrinogen binding to glycoproteins IIb and IIIa (Niewiarowski et al), 651
Ca^{+2} mobilization and fibrinogen binding of platelets refractory to adenosine diphosphate stimulation (Peerschke), 111
Characteristics of high-affinity and low-affinity adenosine binding sites in human cerebral cortex (John and Fox), 401
Cobalamin-binding proteins in human urine: Identification and quantitation (Wahlstedt and Gräsbeck), 439
Development and evaluation of a new kinetic assay for the quantitation of fibronectin gelatin-binding activity (Gelder et al), 416
Immunoradiometric assay to measure the binding of a specific inhibitor to tissue-type plasminogen activator (Schleef et al), 408
Bisphosphonate
Renal transport of bisphosphonates: Accumulation by renal cortical slices enhanced by calcium phosphate ions (Troehler et al), 23
Bleomycin
Deferoxamine injection does not affect bleomycin-induced lung fibrosis in rats (Cross et al), 433
Blocker
Influence of plasma renin content, intrarenal angiotensin II, captopril, and calcium channel blockers on the vasoconstriction and renin release promoted by adenosine in the kidney (Macias-Nuñez et al), 562
Influence of selective thromboxane synthetase blocker CGS-13080 on thromboxane and prostacyclin biosynthesis in whole blood: Evidence for synthesis of prostacyclin by leukocytes from platelet-derived endoperoxides (Mehta et al), 246
Blood flow
Effects of immediate blood flow enhancement on the postischemic kidney: Functional, morphologic, and biochemical assessments (Zager et al), 360
Bone
Do serum aluminum levels reflect underlying skeletal aluminum accumulation and bone histology before or after chelation by deferoxamine? (Hodsman et al), 674
Low rate of bone formation with or without histologic appearance of osteomalacia in patients with aluminum intoxication (Charhon et al), 123
A model for involutional bone loss (Aloia et al), 630
Brain
Cerebral acetylcholine and energy metabolism changes in acute ammonia intoxication in the lower primate *Tupaia glis* (McCandless et al), 183
Characteristics of high-affinity and low-affinity adenosine binding sites in human cerebral cortex (John and Fox), 401
Branched-chain acid
Pharmacokinetic and metabolic interrelationships among branched-chain keto and amino acids in humans (Schauder), 701
Bronchus
Urokinase-type plasminogen activator in alveolar macrophages and bronchoalveolar lavage fluid from normal and smoke-exposed hamsters and humans (Bowen et al), 667

C

C-reactive protein
Cerebrospinal fluid C-reactive protein in infective meningitis in childhood (Donald et al), 424
Calcite
Pathogenesis of pancreatic and biliary $CaCo_3$ lithiasis: The solubility product (K′sp) of calcite determined with the Ca^{++} electrode (Moore and Vérine), 611
Calcium
Ca^{+2} mobilization and fibrinogen binding of platelets refractory to adenosine diphosphate stimulation (Peerschke), 111
Effect of calcium on the availability of platelet von Willebrand factor (Parker et al), 336
Effects of dietary calcium restriction on 1,25-dihydroxyvitamin D_3 net synthesis by rat proximal tubules (Langman et al), 286
Exercise-induced hypercalcemia and the calciotropic hormones (Aloia et al), 229
Pathogenesis of pancreatic and biliary $CaCO_3$ lithiasis: The solubility product (K′sp) of calcite determined with the Ca^{++} electrode (Moore and Vérine), 611
Urinary citrate excretion in normal persons and patients with idiopathic calcium urolithiasis (Hosking et al), 682
Calcium channel blocker
Influence of plasma renin content, intrarenal angiotensin II, captopril, and calcium channel blockers on the vasoconstriction and renin release promoted by adenosine in the kidney (Macias-Nuñez et al), 562
Calcium phosphate
Renal transport of bisphosphonates: Accumulation by renal cortical slices enhanced by calcium phosphate ions (Troehler et al), 23
Captopril
Influence of plasma renin content, intrarenal angiotensin II, captopril, and calcium channel blockers on the vasoconstriction and renin release promoted by adenosine in the kidney (Macias-Nuñez et al), 562
Carbachol
Parallel induction of IgE-mediated *Ascaris* antigen airway responses and increased carbachol airway reactivity in rhesus monkeys by infection with *Ascaris suum* (Patterson and Harris), 293

Cardiomyopathy
Etiologic factors, pathogenesis, and prognosis of dilated cardiomyopathy (Special feature) (Unverferth), 349
Cardiopulmonary bypass surgery
A randomized blind study comparing standard heparin and a new low molecular weight heparinoid in cardiopulmonary bypass surgery in dogs (Henny et al), 187
Cardiovascular system
Effect of vasoactive intestinal polypeptide on the canine cardiovascular system (Unverferth et al), 542
Catecholamine
Ventricular myocardial catecholamines in primates (Pierpont), 205
Cation
Effect of alterations in glomerular charge on deposition of cationic and anionic antibodies to fixed glomerular antigens in the rat (Adler et al), 1
Effect of divalent cations on the interaction of platelets with tumor cells: Aggregation and perfusion studies with two homologous human systems (Bastida et al), 68
Monovalent cation changes in sickle erythrocytes: A direct reflection of α-globin gene number (Embury et al), 75
Cerebrospinal fluid
Cerebrospinal fluid C-reactive protein in infective meningitis in childhood (Donald et al), 424
CGS-13080
Influence of selective thromboxane synthetase blocker CGS-13080 on thromboxane and prostacyclin biosynthesis in whole blood: Evidence for synthesis of prostacyclin by leukocytes from platelet-derived endoperoxides (Mehta et al), 246
Channel blocker
Influence of plasma renin content, intrarenal angiotensin II, captopril, and calcium channel blockers on the vasoconstriction and renin release promoted by adenosine in the kidney (Macias-Nuñez et al), 562
Charcoal
Activated charcoal in theophylline intoxication (Brashear et al), 242
Charge
Effect of alterations in glomerular charge on deposition of cationic and anionic antibodies to fixed glomerular antigens in the rat (Adler et al), 1
Chelation
Do serum aluminum levels reflect underlying skeletal aluminum accumulation and bone histology before or after chelation by deferoxamine? (Hodsman et al), 674
Heart cells in culture: A model of myocardial iron overload and chelation (Link et al), 147
Chemiluminescence
Comparison of superoxide generation and luminol-dependent chemiluminescence with eosinophils and neutrophils from normal individuals (Shult et al), 638
Cholesterol
Defect in cholesterol transport in patients receiving maintenance hemodialysis (Hsia et al), 53
Chromium 51
In vitro detection of endothelial cell damage using 2-deoxy-D-^{3}H-glucose: Comparison with chromium 51, ^{3}H-leucine, ^{3}H-adenine, and lactate dehydrogenase (Andreoli et al), 253
Chymotrypsin
Aggregation of chymotrypsin-treated thrombasthenic platelets is mediated by fibrinogen binding to glycoproteins IIb and IIIa (Niewiarowski et al), 651
Circulation
Radioimmunoassay of human platelet thrombospondin: Different patterns of thrombospondin and β-thromboglobulin antigen secretion and clearance from the circulation (Switalska et al), 690
Citrate
Urinary citrate excretion in normal persons and patients with idiopathic calcium urolithiasis (Hosking et al), 682
Clearance
Radioimmunoassay of human platelet thrombospondin: Different patterns of thrombospondin and β-thromboglobulin antigen secretion and clearance from the circulation (Switalska et al), 690
Cobalamin
Cobalamin-binding proteins in human urine: Identification and quantitation (Wahlstedt and Gräsbeck), 439
Cold
Thromboxane A_2 and prostacyclin do not modulate the systemic hemodynamic response to cold in humans (Gresele et al), 534
Conjugate
Canine antibodies against formaldehyde–dog serum albumin conjugates: Induction, measurement, and specificity (Patterson et al), 93
Cortex, cerebral
Characteristics of high-affinity and low-affinity adenosine binding sites in human cerebral cortex (John and Fox), 401
Cortex, renal
Renal transport of bisphosphonates: Accumulation by renal cortical slices enhanced by calcium phosphate ions (Troehler et al), 23
Cysteine
Cysteine protease inhibitors isolated from human malignant melanoma tissue (Tsushima et al), 712

D

Deferoxamine
Deferoxamine injection does not affect bleomycin-induced lung fibrosis in rats (Cross et al), 433
Do serum aluminum levels reflect underlying skeletal aluminum accumulation and bone histology before or after chelation by deferoxamine? (Hodsman et al), 674
Deficiency
Does zinc deficiency affect intestinal protein content or disaccharidase activity? (Zarling et al), 708

Failure to detect variant (CRM+) plasma thromboplastin antecedent (factor XI) molecules in hereditary plasma thromboplastin antecedent deficiency: A study of 125 patients of several ethnic backgrounds (Saito et al), 718

Degradation
Adenosine triphosphate degradation in specific disease (Special feature) (Fox), 101

Density
Cell heterogeneity in sickle cell disease: Quantitation of the erythrocyte density profile (Rodgers et al), 30

2-Deoxy-D-^{3}H-glucose
In vitro detection of endothelial cell damage using 2-deoxy-D-^{3}H-glucose: Comparison with chromium 51, ^{3}H-leucine, ^{3}H-adenine, and lactate dehydrogenase (Andreoli et al), 253

Diabetes
Effect of insulin treatment in streptozocin-induced diabetic rats on in vitro platelet function and plasma von Willebrand factor activity and factor VIII–related antigen (Winocour et al), 319
Effects of low-protein diet on experimental diabetic nephropathy in the rat (Wen et al), 589

Diet
Effects of dietary calcium restriction on 1,25-dihydroxyvitamin D_3 net synthesis by rat proximal tubules (Langman et al), 286
Effects of low-protein diet on experimental diabetic nephropathy in the rat (Wen et al), 589

1,25-Dihydroxyvitamin D_3
Effects of dietary calcium restriction on 1,25-dihydroxyvitamin D_3 net synthesis by rat proximal tubules (Langman et al), 286

Dilated cardiomyopathy
Etiologic factors, pathogenesis, and prognosis of dilated cardiomyopathy (Special feature) (Unverferth), 349

Disaccharidase
Does zinc deficiency affect intestinal protein content or disaccharidase activity? (Zarling et al), 708

Disease
Abnormality of glycoprotein Ib in two cases of "pseudo"-von Willebrand's disease (Bryckaert et al), 393
Cell heterogeneity in sickle cell disease: Quantitation of the erythrocyte density profile (Rodgers et al), 30
New methods for the release of volatile sulfur compounds from human serum: Its determination by Tenax trapping and gas chromatography and its application in liver diseases (Tangerman et al), 175

Diuretic
Proximal tubule hydrogen ion transport processes in diuretic-induced metabolic alkalosis (Blumenthal et al), 17

Dog serum albumin
Canine antibodies against formaldehyde–dog serum albumin conjugates: Induction, measurement, and specificity (Patterson et al), 93

Duct, bile
Role of ductular bile water reabsorption in canine bile secretion (Tavoloni), 154

E

Effusion, pleural
Immunoglobulin E and other immunoglobulins in patients with eosinophilic pleural effusions (Nash and Wallace), 512

Elastase
Alterations in serum pancreatic elastase 1 content in acute and chronic pancreatitis: Comparison with α-amylase activity (Umeki et al), 578

Endoperoxide
Influence of selective thromboxane synthetase blocker CGS-13080 on thromboxane and prostacyclin biosynthesis in whole blood: Evidence for synthesis of prostacyclin by leukocytes from platelet-derived endoperoxides (Mehta et al), 246

Endothelial cell
In vitro detection of endothelial cell damage using 2-deoxy-D-^{3}H-glucose: Comparison with chromium 51, ^{3}H-leucine, ^{3}H-adenine, and lactate dehydrogenase (Andreoli et al), 253
Sodium morrhuate stimulates granulocytes and damages erythrocytes and endothelial cells: Probable mechanism of an adverse reaction during sclerotherapy (Stroncek et al), 498
Structural features of endotoxin required for stimulation of endothelial cell tissue factor production; exposure of preformed tissue factor after oxidant-mediated endothelial cell injury (Schorer et al), 38

Endotoxin
Structural features of endotoxin required for stimulation of endothelial cell tissue factor production; exposure of preformed tissue factor after oxidant-mediated endothelial cell injury (Schorer et al), 38

Energy
Cerebral acetylcholine and energy metabolism changes in acute ammonia intoxication in the lower primate *Tupaia glis* (McCandless et al), 183

Enzyme-linked immunosorbent assay
Enzyme-linked immunosorbent assay for identification and measurement of antibodies to group A streptococcal bacteriophage (Halperin et al), 505

Eosinophil
Comparison of superoxide generation and luminol-dependent chemiluminescence with eosinophils and neutrophils from normal individuals (Shult et al), 638
Immunoglobulin E and other immunoglobulins in patients with eosinophilic pleural effusions (Nash and Wallace), 512

Epinephrine
External and internal standards in the single-isotope derivative (radioenzymatic) measurement of plasma norepinephrine and epinephrine (Shah et al), 624

Erythrocyte
Cell heterogeneity in sickle cell disease: Quantitation of the erythrocyte density profile (Rodgers et al), 30
Isozymes of human erythrocyte pyrimidine 5′-nucleotidase (Oda et al), 646

Limiting role of 6-phosphogluconolactonase in erythrocyte hexose monophosphate pathway metabolism (Beutler and Kuhl), 573
Monovalent cation changes in sickle erythrocytes: A direct reflection of α-globin gene number (Embury et al), 75
Sodium morrhuate stimulates granulocytes and damages erythrocytes and endothelial cells: Probable mechanism of an adverse reaction during sclerotherapy (Stroncek et al), 498

Erythroid burst
Hematopoietic growth factors in human serum. Erythroid burst–promoting activity in normal subjects and in patients with severe aplastic anemia (Yen et al), 384

Ethanol
One year of ethanol feeding increases circulating thyroid hormones in the dog (Pamenter and Boyden), 141

Exercise
Exercise-induced hypercalcemia and the calciotropic hormones (Aloia et al), 229

F

Factor
Hematopoietic growth factors in human serum. Erythroid burst–promoting activity in normal subjects and in patients with severe aplastic anemia (Yen et al), 384

Factor VIII
Effect of insulin treatment in streptozocin-induced diabetic rats on in vitro platelet function and plasma von Willebrand factor activity and factor VIII–related antigen (Winocour et al), 319

Factor XI
Inhibitors of plasma thromboplastin antecedent (factor XI): Studies on mechanism of inhibition (Goldsmith and Silverman), 279

Fibrinogen
Aggregation of chymotrypsin-treated thrombasthenic platelets is mediated by fibrinogen binding to glycoproteins IIb and IIIa (Niewiarowski et al), 651
Ca^{+2} mobilization and fibrinogen binding of platelets refractory to adenosine diphosphate stimulation (Peerschke), 111
Evidence that production of platelet fibrinogen is synchronous with platelet production in the turpentine-induced acute phase response (Williams et al), 343

Fibroblast
Demonstration of functional low-density lipoprotein receptors by protein blotting in fibroblasts from a subject with homozygous receptor-negative familial hypercholesterolemia (Semenkovich et al), 47

Fibronectin
Development and evaluation of a new kinetic assay for the quantitation of fibronectin gelatin-binding activity (Gelder et al), 416

Fibrosis
Deferoxamine injection does not affect bleomycin-induced lung fibrosis in rats (Cross et al), 433

Formaldehyde
Canine antibodies against formaldehyde–dog serum albumin conjugates: Induction, measurement, and specificity (Patterson et al), 93

G

Galactose
Utilization of galactose by human platelets in vitro (Horne et al), 233

Gas chromatography
New methods for the release of volatile sulfur compounds from human serum: Its determination by Tenax trapping and gas chromatography and its application in liver diseases (Tangerman et al), 175

Gastrin
False-positive gastrin rises after secretin injection (Letter) (Brady et al), 461; (Reply) (Toskes), 461

Gelatin
Development and evaluation of a new kinetic assay for the quantitation of fibronectin gelatin-binding activity (Gelder et al), 416

Gene number
Monovalent cation changes in sickle erythrocytes: A direct reflection of α-globin gene number (Embury et al), 75

α-Globin
Monovalent cation changes in sickle erythrocytes: A direct reflection of α-globin gene number (Embury et al), 75

Glomerulonephritis
Serial changes in humoral and cellular immunity induced by prostaglandin E_2 treatment of murine immune complex glomerulonephritis (McLeish et al), 517

Glomerulus
Age is a determinant of the glomerular morphologic and functional responses to chronic nephron loss (O'Donnell et al), 308
Effect of alterations in glomerular charge on deposition of cationic and anionic antibodies to fixed glomerular antigens in the rat (Adler et al), 1
Serial changes in humoral and cellular immunity induced by prostaglandin E_2 treatment of murine immune complex glomerulonephritis (McLeish et al), 517

Glycoprotein
Abnormality of glycoprotein Ib in two cases of "pseudo"-von Willebrand's disease (Bryckaert et al), 393
Aggregation of chymotrypsin-treated thrombasthenic platelets is mediated by fibrinogen binding to glycoproteins IIb and IIIa (Niewiarowski et al), 651

Granulocyte
Sodium morrhuate stimulates granulocytes and damages erythrocytes and endothelial cells: Probable mechanism of an adverse reaction during sclerotherapy (Stroncek et al), 498

Group A streptococcal bacteriophage
Enzyme-linked immunosorbent assay for identification and measurement of antibodies to group A streptococcal bacteriophage (Halperin et al), 505

Growth
Hematopoietic growth factors in human serum. Erythroid burst–promoting activity in normal subjects and in patients with severe aplastic anemia (Yen et al), 384

H

Heart
Effect of vasoactive intestinal polypeptide on the canine cardiovascular system (Unverferth et al), 542
Heart cells in culture: A model of myocardial iron overload and chelation (Link et al), 147
Ventricular myocardial catecholamines in primates (Pierpont), 205
Hematopoiesis
Hematopoietic growth factors in human serum. Erythroid burst–promoting activity in normal subjects and in patients with severe aplastic anemia (Yen et al), 384
Hemodialysis
Defect in cholesterol transport in patients receiving maintenance hemodialysis (Hsia et al), 53
Hemodynamics
Thromboxane A_2 and prostacyclin do not modulate the systemic hemodynamic response to cold in humans (Gresele et al), 534
Hemophilia
Impaired cell-mediated immunity in hemophilia. II. Persistence of subclinical immunodeficiency and enhancement of natural killer activity by lymphokines (Lederman et al), 197
Heparin
A randomized blind study comparing standard heparin and a new low molecular weight heparinoid in cardiopulmonary bypass surgery in dogs (Henny et al), 187
Heparinoid
A randomized blind study comparing standard heparin and a new low molecular weight heparinoid in cardiopulmonary bypass surgery in dogs (Henny et al), 187
Hepatocyte
Human circulating monocytes internalize ^{125}I-insulin in a similar fashion to rat hepatocytes: Relevance to receptor regulation in target and nontarget tissues (Grunberger et al), 211
Hereditary giant platelet syndrome
Platelet size and shape in hereditary giant platelet syndromes on blood smear and in suspension: Evidence for two types of abnormalities (Milton et al), 326
Heterogeneity
Cell heterogeneity in sickle cell disease: Quantitation of the erythrocyte density profile (Rodgers et al), 30
Hexose monophosphate pathway
Limiting role of 6-phosphogluconolactonase in erythrocyte hexose monophosphate pathway metabolism (Beutler and Kuhl), 573
Homozygote
Demonstration of functional low-density lipoprotein receptors by protein blotting in fibroblasts from a subject with homozygous receptor-negative familial hypercholesterolemia (Semenkovich et al), 47
Hormone
Effects of thyroid hormone on Na-K-adenosine triphosphatase activity along the rat nephron (Garg and Tisher), 568
Exercise-induced hypercalcemia and the calciotropic hormones (Aloia et al), 229
One year of ethanol feeding increases circulating thyroid hormones in the dog (Pamenter and Boyden), 141
Renal and hormonal responses to acute hypoxia in normal individuals (Ashack et al), 12
Hydrogen
Proximal tubule hydrogen ion transport processes in diuretic-induced metabolic alkalosis (Blumenthal et al), 17
Hypercalcemia
Exercise-induced hypercalcemia and the calciotropic hormones (Aloia et al), 229
Hypercapnia
Effect of acute hypercapnia on renal bicarbonate reabsorption in the dog (Nasca et al), 524
Hypercholesterolemia
Demonstration of functional low-density lipoprotein receptors by protein blotting in fibroblasts from a subject with homozygous receptor-negative familial hypercholesterolemia (Semenkovich et al), 47
Weight loss improves lipoprotein lipid profiles in patients with hypercholesterolemia (Davis et al), 447
Hyperoxia
Hyperoxic lung injury: Biochemical, cellular, and morphologic characterization in the mouse (Smith), 269
Hypertension
Antihypertensive effect of riboflavin analogues in spontaneously hypertensive rats (Trachewsky and Kem), 223
Sodium-potassium-adenosine triphosphatase in nephron segments of spontaneously hypertensive rats (Garg and Narang), 43
Hypoxia
Renal and hormonal responses to acute hypoxia in normal individuals (Ashack et al), 12

I

Idiopathic calcium urolithiasis
Urinary citrate excretion in normal persons and patients with idiopathic calcium urolithiasis (Hosking et al), 682
Immune complex
Serial changes in humoral and cellular immunity induced by prostaglandin E_2 treatment of murine immune complex glomerulonephritis (McLeish et al), 517
Immunity
Impaired cell-mediated immunity in hemophilia. II. Persistence of subclinical immunodeficiency and enhancement of natural killer activity by lymphokines (Lederman et al), 197
Serial changes in humoral and cellular immunity induced by prostaglandin E_2 treatment of murine immune complex glomerulonephritis (McLeish et al), 517
Immunoassay
Immunoassay for IgG rheumatoid factor with a murine monoclonal anti-Fd antibody (McDougal et al), 80

Immunodeficiency
Impaired cell-mediated immunity in hemophilia. II. Persistence of subclinical immunodeficiency and enhancement of natural killer activity by lymphokines (Lederman et al), 197
Immunoglobulin
Immunoassay for IgG rheumatoid factor with a murine monoclonal anti-Fd antibody (McDougal et al), 80
Immunoglobulin E and other immunoglobulins in patients with eosinophilic pleural effusions (Nash and Wallace), 512
Parallel induction of IgE-mediated *Ascaris* antigen airway responses and increased carbachol airway reactivity in rhesus monkeys by infection with *Ascaris suum* (Patterson and Harris), 293
Immunoradiometry
Immunoradiometric assay to measure the binding of a specific inhibitor to tissue-type plasminogen activator (Schleef et al), 408
Incubation
Effect of atmosphere of incubation on the isolation of group A streptococci from throat cultures (Schwartz et al), 88
Influenza A
Modifications of lung clearance mechanisms by acute influenza A infection (Levandowski et al), 428
Inhibition
Profound pharmacologic inhibition of renal tubule sodium and water reabsorption in rats (Middendorf and Grantham), 455
Inhibitor
Cysteine protease inhibitors isolated from human malignant melanoma tissue (Tsushima et al), 712
Immunoradiometric assay to measure the binding of a specific inhibitor to tissue-type plasminogen activator (Schleef et al), 408
Inhibitors of plasma thromboplastin antecedent (factor XI): Studies on mechanism of inhibition (Goldsmith and Silverman), 279
Injury
Proliferation of smooth muscle cells in the thoracic aorta after injury to the abdominal aorta: Evidence for a humoral mediator in experimental arteriosclerosis (Stemerman et al), 369
Insulin
Effect of insulin treatment in streptozocin-induced diabetic rats on in vitro platelet function and plasma von Willebrand factor activity and factor VIII–related antigen (Winocour et al), 319
Human circulating monocytes internalize ^{125}I-insulin in a similar fashion to rat hepatocytes: Relevance to receptor regulation in target and nontarget tissues (Grunberger et al), 211
Intestine
Does zinc deficiency affect intestinal protein content or disaccharidase activity? (Zarling et al), 708
Effect of vasoactive intestinal polypeptide on the canine cardiovascular system (Unverferth et al), 542
Intoxication
Activated charcoal in theophylline intoxication (Brashear et al), 242
Cerebral acetylcholine and energy metabolism changes in acute ammonia intoxication in the lower primate *Tupaia glis* (McCandless et al), 183
Low rate of bone formation with or without histologic appearance of osteomalacia in patients with aluminum intoxication (Charhon et al), 123
Involution
A model for involutional bone loss (Aloia et al), 630
Iodine 125
Human circulating monocytes internalize ^{125}I-insulin in a similar fashion to rat hepatocytes: Relevance to receptor regulation in target and nontarget tissues (Grunberger et al), 211
Iron
Heart cells in culture: A model of myocardial iron overload and chelation (Link et al), 147
Ischemia
Effects of immediate blood flow enhancement on the postischemic kidney: Functional, morphologic, and biochemical assessments (Zager et al), 360
Isotope
External and internal standards in the single-isotope derivative (radioenzymatic) measurement of plasma norepinephrine and epinephrine (Shah et al), 624
Isozyme
Isozymes of human erythrocyte pyrimidine 5′-nucleotidase (Oda et al), 646

K

Keto acid
Pharmacokinetic and metabolic interrelationships among branched-chain keto and amino acids in humans (Schauder), 701
Kidney
Effect of acute hypercapnia on renal bicarbonate reabsorption in the dog (Nasca et al), 524
Effects of genetic obesity on renal structure and function in the Zucker rat (Kasiske et al), 598
Effects of genetic obesity on renal structure and function in the Zucker rat. II. Micropuncture studies (O'Donnell et al), 605
Effects of immediate blood flow enhancement on the postischemic kidney: Functional, morphologic, and biochemical assessments (Zager et al), 360
Effects of low-protein diet on experimental diabetic nephropathy in the rat (Wen et al), 589
Influence of plasma renin content, intrarenal angiotensin II, captopril, and calcium channel blockers on the vasoconstriction and renin release promoted by adenosine in the kidney (Macias-Nuñez et al), 562
Profound pharmacologic inhibition of renal tubule sodium and water reabsorption in rats (Middendorf and Grantham), 455
Renal and hormonal responses to acute hypoxia in normal individuals (Ashack et al), 12

Renal transport of bisphosphonates: Accumulation by renal cortical slices enhanced by calcium phosphate ions (Troehler et al), 23
Serial changes in humoral and cellular immunity induced by prostaglandin E_2 treatment of murine immune complex glomerulonephritis (McLeish et al), 517
Studies on the purification of thrombopoietin from kidney cell culture medium (McDonald et al), 162
Suppression of human lymphocyte responses in chronic renal failure mediated by adherent cells: Analysis in serum-free media (Kleiman and Zoschke), 262

Killer cell, natural
Impaired cell-mediated immunity in hemophilia. II. Persistence of subclinical immunodeficiency and enhancement of natural killer activity by lymphokines (Lederman et al), 197

L

Lactate dehydrogenase
In vitro detection of endothelial cell damage using 2-deoxy-D-^{3}H-glucose: Comparison with chromium 51, ^{3}H-leucine, ^{3}H-adenine, and lactate dehydrogenase (Andreoli et al), 253

Lavage
Urokinase-type plasminogen activator in alveolar macrophages and bronchoalveolar lavage fluid from normal and smoke-exposed hamsters and humans (Bowen et al), 667

Leucine
In vitro detection of endothelial cell damage using 2-deoxy-D-^{3}H-glucose: Comparison with chromium 51, ^{3}H-leucine, ^{3}H-adenine, and lactate dehydrogenase (Andreoli et al), 253

Leukocyte
Influence of selective thromboxane synthetase blocker CGS-13080 on thromboxane and prostacyclin biosynthesis in whole blood: Evidence for synthesis of prostacyclin by leukocytes from platelet-derived endoperoxides (Mehta et al), 246

Lipid
Weight loss improves lipoprotein lipid profiles in patients with hypercholesterolemia (Davis et al), 447

Lipoprotein
Demonstration of functional low-density lipoprotein receptors by protein blotting in fibroblasts from a subject with homozygous receptor-negative familial hypercholesterolemia (Semenkovich et al), 47
Weight loss improves lipoprotein lipid profiles in patients with hypercholesterolemia (Davis et al), 447

Lithiasis
Pathogenesis of pancreatic and biliary $CaCo_3$ lithiasis: The solubility product (K′sp) of calcite determined with the Ca^{++} electrode (Moore and Vérine), 611
Urinary citrate excretion in normal persons and patients with idiopathic calcium urolithiasis (Hosking et al), 682

Liver
Effect of hepatic failure toxins on liver thymidine kinase activity and ornithine decarboxylase activity after massive necrosis with acetaminophen in the rat (Zieve et al), 583
New methods for the release of volatile sulfur compounds from human serum: Its determination by Tenax trapping and gas chromatography and its application in liver diseases (Tangerman et al), 175

Low-protein diet
Effects of low-protein diet on experimental diabetic nephropathy in the rat (Wen et al), 589

Luminol
Comparison of superoxide generation and luminol-dependent chemiluminescence with eosinophils and neutrophils from normal individuals (Shult et al), 638

Lung
Deferoxamine injection does not affect bleomycin-induced lung fibrosis in rats (Cross et al), 433
Hyperoxic lung injury: Biochemical, cellular, and morphologic characterization in the mouse (Smith), 269
Immunoglobulin E and other immunoglobulins in patients with eosinophilic pleural effusions (Nash and Wallace), 512
Modifications of lung clearance mechanisms by acute influenza A infection (Levandowski et al), 428

Lymphocyte
Suppression of human lymphocyte responses in chronic renal failure mediated by adherent cells: Analysis in serum-free media (Kleiman and Zoschke), 262

Lymphokine
Impaired cell-mediated immunity in hemophilia. II. Persistence of subclinical immunodeficiency and enhancement of natural killer activity by lymphokines (Lederman et al), 197

M

Macrophage
Urokinase-type plasminogen activator in alveolar macrophages and bronchoalveolar lavage fluid from normal and smoke-exposed hamsters and humans (Bowen et al), 667

Marfan's syndrome
Marfan's syndrome: Structural, biochemical, and mechanical studies of the aortic media (Perejda et al), 376

Media, aortic
Marfan's syndrome: Structural, biochemical, and mechanical studies of the aortic media (Perejda et al), 376

Melanoma
Cysteine protease inhibitors isolated from human malignant melanoma tissue (Tsushima et al), 712

Meningitis
Cerebrospinal fluid C-reactive protein in infective meningitis in childhood (Donald et al), 424

Metabolic alkalosis
Proximal tubule hydrogen ion transport processes in diuretic-induced metabolic alkalosis (Blumenthal et al), 17

Metabolic balance
Relationship between body store of vitamin B_6 and plasma pyridoxal-P clearance: Metabolic balance studies in humans (Lui et al), 491

Metabolism
Cerebral acetylcholine and energy metabolism changes in acute ammonia intoxication in the lower primate *Tupaia glis* (McCandless et al), 183
Micropuncture
Effects of genetic obesity on renal structure and function in the Zucker rat. II. Micropuncture studies (O'Donnell et al), 605
Monoclonal antibody
Immunoassay for IgG rheumatoid factor with a murine monoclonal anti-Fd antibody (McDougal et al), 80
Monocyte
Human circulating monocytes internalize ^{125}I-insulin in a similar fashion to rat hepatocytes: Relevance to receptor regulation in target and nontarget tissues (Grunberger et al), 211
Muscle
Proliferation of smooth muscle cells in the thoracic aorta after injury to the abdominal aorta: Evidence for a humoral mediator in experimental arteriosclerosis (Stemerman et al), 369
Myocardium
Heart cells in culture: A model of myocardial iron overload and chelation (Link et al), 147
Ventricular myocardial catecholamines in primates (Pierpont), 205

N

Natural killer cell
Impaired cell-mediated immunity in hemophilia. II. Persistence of subclinical immunodeficiency and enhancement of natural killer activity by lymphokines (Lederman et al), 197
Nephron
Age is a determinant of the glomerular morphologic and functional responses to chronic nephron loss (O'Donnell et al), 308
Effects of thyroid hormone on Na-K-adenosine triphosphatase activity along the rat nephron (Garg and Tisher), 568
Sodium-potassium-adenosine triphosphatase in nephron segments of spontaneously hypertensive rats (Garg and Narang), 43
Nephropathy
Effects of low-protein diet on experimental diabetic nephropathy in the rat (Wen et al), 589
Neutrophil
Comparison of superoxide generation and luminol-dependent chemiluminescence with eosinophils and neutrophils from normal individuals (Shult et al), 638
Stimulus-specific neutrophil aggregation: Evaluation of possible mechanisms for the stimulus-response apparatus (Ringertz et al), 132
Norepinephrine
External and internal standards in the single-isotope derivative (radioenzymatic) measurement of plasma norepinephrine and epinephrine (Shah et al), 624

O

Obesity
Effects of genetic obesity on renal structure and function in the Zucker rat (Kasiske et al), 598
Effects of genetic obesity on renal structure and function in the Zucker rat. II. Micropuncture studies (O'Donnell et al), 605
Ornithine decarboxylase
Effect of hepatic failure toxins on liver thymidine kinase activity and ornithine decarboxylase activity after massive necrosis with acetaminophen in the rat (Zieve et al), 583
Osteomalacia
Low rate of bone formation with or without histologic appearance of osteomalacia in patients with aluminum intoxication (Charhon et al), 123
Overload
Heart cells in culture: A model of myocardial iron overload and chelation (Link et al), 147
Oxidant
Structural features of endotoxin required for stimulation of endothelial cell tissue factor production; exposure of preformed tissue factor after oxidant-mediated endothelial cell injury (Schorer et al), 38

P

Pancreas
Alterations in serum pancreatic elastase 1 content in acute and chronic pancreatitis: Comparison with α-amylase activity (Umeki et al), 578
Pathogenesis of pancreatic and biliary $CaCO_3$ lithiasis: The solubility product (K′sp) of calcite determined with the Ca^{++} electrode (Moore and Vérine), 611
Pancreatic elastase 1
Alterations in serum pancreatic elastase 1 content in acute and chronic pancreatitis: Comparison with α-amylase activity (Umeki et al), 578
Pancreatitis
Alterations in serum pancreatic elastase 1 content in acute and chronic pancreatitis: Comparison with α-amylase activity (Umeki et al), 578
Pathway
Limiting role of 6-phosphogluconolactonase in erythrocyte hexose monophosphate pathway metabolism (Beutler and Kuhl), 573
Perfusion
Effect of divalent cations on the interaction of platelets with tumor cells: Aggregation and perfusion studies with two homologous human systems (Bastida et al), 68
6-Phosphogluconolactonase
Limiting role of 6-phosphogluconolactonase in erythrocyte hexose monophosphate pathway metabolism (Beutler and Kuhl), 573
Plasma
Effect of insulin treatment in streptozocin-induced diabetic rats on in vitro platelet function and plasma von Willebrand factor activity and factor VIII–related antigen (Winocour et al), 319

External and internal standards in the single-isotope derivative (radioenzymatic measurement of plasma norepinephrine and epinephrine (Shah et al), 624
Plasma concentrations of the natural anticoagulants protein C and protein S in patients with proteinuria (Cosio et al), 218

Plasmin thromboplastin antecedent
Failure to detect variant (CRM^+) plasma thromboplastin antecedent (factor XI) molecules in hereditary plasma thromboplastin antecedent deficiency: A study of 125 patients of several ethnic backgrounds (Saito et al), 718
Inhibitors of plasma thromboplastin antecedent (factor XI): Studies on mechanism of inhibition (Goldsmith and Silverman), 279

Plasminogen
Immunoradiometric assay to measure the binding of a specific inhibitor to tissue-type plasminogen activator (Schleef et al), 408
Urokinase-type plasminogen activator in alveolar macrophages and bronchoalveolar lavage fluid from normal and smoke-exposed hamsters and humans (Bowen et al), 667

Platelet
Aggregation of chymotrypsin-treated thrombasthenic platelets is mediated by fibrinogen binding to glycoproteins IIb and IIIa (Niewiarowski et al), 651
Ca^{+2} mobilization and fibrinogen binding of platelets refractory to adenosine diphosphate stimulation (Peerschke), 111
Effect of calcium on the availability of platelet von Willebrand factor (Parker et al), 336
Effect of divalent cations on the interaction of platelets with tumor cells: Aggregation and perfusion studies with two homologous human systems (Bastida et al), 68
Effect of insulin treatment in streptozocin-induced diabetic rats on in vitro platelet function and plasma von Willebrand factor activity and factor VIII–related antigen (Winocour et al), 319
Evidence that production of platelet fibrinogen is synchronous with platelet production in the turpentine-induced acute phase response (Williams et al), 343
Increase in human platelet α_2-adrenergic receptor affinity for agonist in unstable angina (Mehta et al), 661
Platelet size and shape in hereditary giant platelet syndromes on blood smear and in suspension: Evidence for two types of abnormalities (Milton et al), 326
Radioimmunoassay of human platelet thrombospondin: Different patterns of thrombospondin and β-thromboglobulin antigen secretion and clearance from the circulation (Switalska et al), 690
Refractoriness of platelets to prostaglandins after infusion in rabbits (Bertelé et al), 551
Subcellular localization of vasopressin-like material in platelets (Chesney et al), 314
Utilization of galactose by human platelets in vitro (Horne et al), 233

Pleura
Immunoglobulin E and other immunoglobulins in patients with eosinophilic pleural effusions (Nash and Wallace), 512

Pneumococcus
Pneumococcus-induced thrombocytopenia in rabbits (Goldblum et al), 298

Polypeptide
Effect of vasoactive intestinal polypeptide on the canine cardiovascular system (Unverferth et al), 542

Potassium
Effects of thyroid hormone on Na-K-adenosine triphosphatase activity along the rat nephron (Garg and Tisher), 568
Sodium-potassium-adenosine triphosphatase in nephron segments of spontaneously hypertensive rats (Garg and Narang), 43

Program
Combined annual meeting: Central Society for Clinical Research; Midwest Section, American Federation for Clinical Research; Midwest Society for Pediatric Research; Midwest Region, Society for Investigative Dermatology, 463

Prostacyclin
Influence of selective thromboxane synthetase blocker CGS-13080 on thromboxane and prostacyclin biosynthesis in whole blood: Evidence for synthesis of prostacyclin by leukocytes from platelet-derived endoperoxides (Mehta et al), 246
Thromboxane A_2 and prostacyclin do not modulate the systemic hemodynamic response to cold in humans (Gresele et al), 534

Prostaglandin
Refractoriness of platelets to prostaglandins after infusion in rabbits (Bertelé et al), 551
Serial changes in humoral and cellular immunity induced by prostaglandin E_2 treatment of murine immune complex glomerulonephritis (McLeish et al), 517

Protease
Cysteine protease inhibitors isolated from human malignant melanoma tissue (Tsushima et al), 712

Protein
Cerebrospinal fluid C-reactive protein in infective meningitis in childhood (Donald et al), 424
Cobalamin-binding proteins in human urine: Identification and quantitation (Wahlstedt and Gräsbeck), 439
Does zinc deficiency affect intestinal protein content or disaccharidase activity? (Zarling et al), 708

Protein blotting
Demonstration of functional low-density lipoprotein receptors by protein blotting in fibroblasts from a subject with homozygous receptor-negative familial hypercholesterolemia (Semenkovich et al), 47

Protein C
Plasma concentrations of the natural anticoagulants protein C and protein S in patients with proteinuria (Cosio et al), 218

Protein S
Plasma concentrations of the natural anticoagulants protein C and protein S in patients with proteinuria (Cosio et al), 218
Proteinuria
Adriamycin-induced chronic proteinuria: A structural and functional study (O'Donnell et al), 62
Plasma concentrations of the natural anticoagulants protein C and protein S in patients with proteinuria (Cosio et al), 218
Proximal tubule
Effects of dietary calcium restriction on 1,25-dihydroxyvitamin D_3 net synthesis by rat proximal tubules (Langman et al), 286
Proximal tubule hydrogen ion transport processes in diuretic-induced metabolic alkalosis (Blumenthal et al), 17
Pyridoxal-P
Relationship between body store of vitamin B_6 and plasma pyridoxal-P clearance: Metabolic balance studies in humans (Lui et al), 491
Pyrimidine 5'-nucleotidase
Isozymes of human erythrocyte pyrimidine 5'-nucleotidase (Oda et al), 646

R

Radioenzyme
External and internal standards in the single-isotope derivative (radioenzymatic) measurement of plasma norepinephrine and epinephrine (Shah et al), 624
Radioimmunoassay
Radioimmunoassay for urinary amyloid P component (Maury and Teppo), 619
Radioimmunoassay of human platelet thrombospondin: Different patterns of thrombospondin and β-thromboglobulin antigen secretion and clearance from the circulation (Switalska et al), 690
Reabsorption
Effect of acute hypercapnia on renal bicarbonate reabsorption in the dog (Nasca et al), 524
Profound pharmacologic inhibition of renal tubule sodium and water reabsorption in rats (Middendorf and Grantham), 455
Role of ductular bile water reabsorption in canine bile secretion (Tavoloni), 154
Receptor
Demonstration of functional low-density lipoprotein receptors by protein blotting in fibroblasts from a subject with homozygous receptor-negative familial hypercholesterolemia (Semenkovich et al), 47
Human circulating monocytes internalize ^{125}I-insulin in a similar fashion to rat hepatocytes: Relevance to receptor regulation in target and nontarget tissues (Grunberger et al), 211
Refractoriness
Ca^{+2} mobilization and fibrinogen binding of platelets refractory to adenosine diphosphate stimulation (Peerschke), 111
Refractoriness of platelets to prostaglandins after infusion in rabbits (Bertelé et al), 551
Renin
Influence of plasma renin content, intrarenal angiotensin II, captopril, and calcium channel blockers on the vasoconstriction and renin release promoted by adenosine in the kidney (Macias-Nuñez et al), 562
Rheumatoid factor
Immunoassay for IgG rheumatoid factor with a murine monoclonal anti-Fd antibody (McDougal et al), 80
Riboflavin
Antihypertensive effect of riboflavin analogues in spontaneously hypertensive rats (Trachewsky and Kem), 223

S

Sclerotherapy
Sodium morrhuate stimulates granulocytes and damages erythrocytes and endothelial cells: Probable mechanism of an adverse reaction during sclerotherapy (Stroncek et al), 498
Secretin
False-positive gastrin rises after secretin injection (Letter) (Brady et al), 461; (Reply) (Toskes), 461
Serum
New methods for the release of volatile sulfur compounds from human serum: Its determination by Tenax trapping and gas chromatography and its application in liver diseases (Tangerman et al), 175
Sickle cell
Monovalent cation changes in sickle erythrocytes: A direct reflection of α-globin gene number (Embury et al), 75
Sickle cell disease
Cell heterogeneity in sickle cell disease: Quantitation of the erythrocyte density profile (Rodgers et al), 30
Skeleton
Do serum aluminum levels reflect underlying skeletal aluminum accumulation and bone histology before or after chelation by deferoxamine? (Hodsman et al), 674
Smoke, cigarette
Urokinase-type plasminogen activator in alveolar macrophages and bronchoalveolar lavage fluid from normal and smoke-exposed hamsters and humans (Bowen et al), 667
Sodium
Effects of thyroid hormone on Na-K-adenosine triphosphatase activity along the rat nephron (Garg and Tisher), 568
Profound pharmacologic inhibition of renal tubule sodium and water reabsorption in rats (Middendorf and Grantham), 455
Sodium-potassium-adenosine triphosphatase in nephron segments of spontaneously hypertensive rats (Garg and Narang), 43
Sodium morrhuate
Sodium morrhuate stimulates granulocytes and damages erythrocytes and endothelial cells: Probable mechanism of an adverse reaction during sclerotherapy (Stroncek et al), 498

Solubility
Pathogenesis of pancreatic and biliary $CaCO_3$ lithiasis: The solubility product (K'sp) of calcite determined with the Ca^{++} electrode (Moore and Vérine), 611
Stimulus-response apparatus
Stimulus-specific neutrophil aggregation: Evaluation of possible mechanisms for the stimulus-response apparatus (Ringertz et al), 132
Streptococcus
Effect of atmosphere of incubation on the isolation of group A streptococci from throat cultures (Schwartz et al), 88
Enzyme-linked immunosorbent assay for identification and measurement of antibodies to group A streptococcal bacteriophage (Halperin et al), 505
Streptozocin
Effect of insulin treatment in streptozocin-induced diabetic rats on in vitro platelet function and plasma von Willebrand factor activity and factor VIII–related antigen (Winocour et al), 319
Sulfur
New methods for the release of volatile sulfur compounds from human serum: Its determination by Tenax trapping and gas chromatography and its application in liver diseases (Tangerman et al), 175
Superoxide
Comparison of superoxide generation and luminol-dependent chemiluminescence with eosinophils and neutrophils from normal individuals (Shult et al), 638
Syndrome
Marfan's syndrome: Structural, biochemical, and mechanical studies of the aortic media (Perejda et al), 376
Platelet size and shape in hereditary giant platelet syndromes on blood smear and in suspension: Evidence for two types of abnormalities (Milton et al), 326

T

Tenax trap
New methods for the release of volatile sulfur compounds from human serum: Its determination by Tenax trapping and gas chromatography and its application in liver diseases (Tangerman et al), 175
Theophylline
Activated charcoal in theophylline intoxication (Brashear et al), 242
Throat
Effect of atmosphere of incubation on the isolation of group A streptococci from throat cultures (Schwartz et al), 88
Thrombasthenia
Aggregation of chymotrypsin-treated thrombasthenic platelets is mediated by fibrinogen binding to glycoproteins IIb and IIIa (Niewiarowski et al), 651
Thrombocytopenia
Pneumococcus-induced thrombocytopenia in rabbits (Goldblum et al), 298
β-Thromboglobulin
Radioimmunoassay of human platelet thrombospondin: Different patterns of thrombospondin and β-thromboglobulin antigen secretion and clearance from the circulation (Switalska et al), 690
Thromboplastin
Failure to detect variant (CRM^+) plasma thromboplastin antecedent (factor XI) molecules in hereditary plasma thromboplastin antecedent deficiency: A study of 125 patients of several ethnic backgrounds (Saito et al), 718
Inhibitors of plasma thromboplastin antecedent (factor XI): Studies on mechanism of inhibition (Goldsmith and Silverman), 279
Thrombopoietin
Studies on the purification of thrombopoietin from kidney cell culture medium (McDonald et al), 162
Thrombospondin
Radioimmunoassay of human platelet thrombospondin: Different patterns of thrombospondin and β-thromboglobulin antigen secretion and clearance from the circulation (Switalska et al), 690
Thromboxane
Influence of selective thromboxane synthetase blocker CGS-13080 on thromboxane and prostacyclin biosynthesis in whole blood: Evidence for synthesis of prostacyclin by leukocytes from platelet-derived endoperoxides (Mehta et al), 246
Thromboxane A_2 and prostacyclin do not modulate the systemic hemodynamic response to cold in humans (Gresele et al), 534
Thromboxane synthetase
Influence of selective thromboxane synthetase blocker CGS-13080 on thromboxane and prostacyclin biosynthesis in whole blood: Evidence for synthesis of prostacyclin by leukocytes from platelet-derived endoperoxides (Mehta et al), 246
Thymidine kinase
Effect of hepatic failure toxins on liver thymidine kinase activity and ornithine decarboxylase activity after massive necrosis with acetaminophen in the rat (Zieve et al), 583
Thyroid gland
Effects of thyroid hormone on Na-K-adenosine triphosphatase activity along the rat nephron (Garg and Tisher), 568
One year of ethanol feeding increases circulating thyroid hormones in the dog (Pamenter and Boyden), 141
Tissue
Cysteine protease inhibitors isolated from human malignant melanoma tissue (Tsushima et al), 712
Do serum aluminum levels reflect underlying skeletal aluminum accumulation and bone histology before or after chelation by deferoxamine? (Hodsman et al), 674
Human circulating monocytes internalize ^{125}I-insulin in a similar fashion to rat hepatocytes: Relevance to receptor regulation in target and nontarget tissues (Grunberger et al), 211
Low rate of bone formation with or without histologic appearance of osteomalacia in patients with aluminum intoxication (Charhon et al), 123

Tissue factor
Structural features of endotoxin required for stimulation of endothelial cell tissue factor production; exposure of preformed tissue factor after oxidant-mediated endothelial cell injury (Schorer et al), 38
Tissue-type plasminogen activator
Immunoradiometric assay to measure the binding of a specific inhibitor to tissue-type plasminogen activator (Schleef et al), 408
Toxin
Effect of hepatic failure toxins on liver thymidine kinase activity and ornithine decarboxylase activity after massive necrosis with acetaminophen in the rat (Zieve et al), 583
Transport
Defect in cholesterol transport in patients receiving maintenance hemodialysis (Hsia et al), 53
Proximal tubule hydrogen ion transport processes in diuretic-induced metabolic alkalosis (Blumenthal et al), 17
Renal transport of bisphosphonates: Accumulation by renal cortical slices enhanced by calcium phosphate ions (Troehler et al), 23
Tritium
In vitro detection of endothelial cell damage using 2-deoxy-D-^{3}H-glucose: Comparison with chromium 51, ^{3}H-leucine, ^{3}H-adenine, and lactate dehydrogenase (Andreoli et al), 253
Tumor
Effect of divalent cations on the interaction of platelets with tumor cells: Aggregation and perfusion studies with two homologous human systems (Bastida et al), 68
Turpentine
Evidence that production of platelet fibrinogen is synchronous with platelet production in the turpentine-induced acute phase response (Williams et al), 343

U

Urine
Cobalamin-binding proteins in human urine: Identification and quantitation (Wahlstedt and Gräsbeck), 439
Radioimmunoassay for urinary amyloid P component (Maury and Teppo), 619
Urinary citrate excretion in normal persons and patients with idiopathic calcium urolithiasis (Hosking et al), 682
Urokinase
Urokinase-type plasminogen activator in alveolar macrophages and bronchoalveolar lavage fluid from normal and smoke-exposed hamsters and humans (Bowen et al), 667

V

Vasoactive intestinal polypeptide
Effect of vasoactive intestinal polypeptide on the canine cardiovascular system (Unverferth et al), 542
Vasoconstriction
Influence of plasma renin content, intrarenal angiotensin II, captopril, and calcium channel blockers on the vasoconstriction and renin release promoted by adenosine in the kidney (Macias-Nuñez et al), 562
Vasopressin
Subcellular localization of vasopressin-like material in platelets (Chesney et al), 314
Ventricle
Ventricular myocardial catecholamines in primates (Pierpont), 205
Vitamin
Effects of dietary calcium restriction on 1,25-dihydroxyvitamin D_3 net synthesis by rat proximal tubules (Langman et al), 286
Relationship between body store of vitamin B_6 and plasma pyridoxal-P clearance: Metabolic balance studies in humans (Lui et al), 491
von Willebrand factor
Effect of calcium on the availability of platelet von Willebrand factor (Parker et al), 336
Effect of insulin treatment in streptozocin-induced diabetic rats on in vitro platelet function and plasma von Willebrand factor activity and factor VIII–related antigen (Winocour et al), 319
von Willebrand's disease
Abnormality of glycoprotein Ib in two cases of "pseudo"-von Willebrand's disease (Bryckaert et al), 393

W

Water
Profound pharmacologic inhibition of renal tubule sodium and water reabsorption in rats (Middendorf and Grantham), 455
Weight
Weight loss improves lipoprotein lipid profiles in patients with hypercholesterolemia (Davis et al), 447

Z

Zinc
Does zinc deficiency affect intestinal protein content or disaccharidase activity? (Zarling et al), 708
Zucker rat
Effects of genetic obesity on renal structure and function in the Zucker rat (Kasiske et al), 598
Effects of genetic obesity on renal structure and function in the Zucker rat. II. Micropuncture studies (O'Donnell et al), 605
